Dear Ms. Weiner:

I would like to thank you and the other cast members for bringing "Building Houses on the Moon" to the Norwich Free Academy. I would also like to thank writer, producer and director, Jeff Soloman for creating this poignant and meaningful play.

"Building Houses on the Moon" is an extremely professional performance and provides the opportunity to support true diversity in schools, including sexual identity. The play reinforces an atmosphere of acceptance and encourages dialog to better understand these issues for students and adults. "Building Houses on the Moon" played to a packed audience of over 600 students at our school and received a well-deserved standing ovation.

We look forward to bringing future productions highlighting other important issues to our school. Thank you very much.

Sincerely yours,

John Lovino
Director of Student Affairs
